

M.O.S.T. Toolz™

Microprocessor Card Development Kit

Each M.O.S.T. Toolz kit comes with one of four reader options: PCMCIA, Dual Interface (Contact/Contactless), USB, or ExpressCard.

Designed for multifunction and high security smart card systems, M.O.S.T. Toolz™ is a low-cost standalone complement to the Smart Toolz® Smart Card Application Development Kit. M.O.S.T. Toolz features robust software for rapid system development, plus five microprocessor smart cards for system and file setup and your choice of PCMCIA, USB, ExpressCard, or Dual Interface contact/contactless reader. Visual Basic, .NET, C++, and C# programming examples with full documentation complete the kit.

The M.O.S.T. Toolz Card Configuration Utility helps you build an on-card file system with direct calls to the M.O.S.T. Card®. High level commands are sent through the Winplex® API to the reader that comes with the M.O.S.T. Toolz kit. M.O.S.T. Toolz enables programmers to create a smart card-based transaction system that updates and secures files while setting a variety of defensive measures

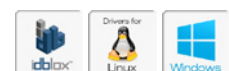

to protect user ID, card access, and file information.

CardLogix gives you the power to deliver multiple products and services on a single card, allowing for fast system design and easy updating without the need for card re-issuance.

Features	Benefits
Full support for Windows XP, Vista, 7, and 8	Maximum support for all major Windows OS flavors
On-card data editor allows you to load user data, then edit immediately*	Better visibility into the use of card data with a secondary application
Supports newest CardLogix M.O.S.T. C Series contact and contactless cards and file types, including EF, Linear, Cyclic, Purse, Global Password and extended file types*	Full support across the entire CardLogix M.O.S.T. Card product line
Advanced PC/SC reader support, including PCMCIA, ExpressCard, USB, and Dual Interface readers*	Greater control for third-party hardware support
New PC/SC Reader Configuration Utility	Better visibility of reader call functions
New card file list and label manager with memory resource organizer*	Enables better organization of card files as they are matched to other software applications

* New features in M.O.S.T. Toolz 4.0
