Empower
Your Vision
with Smart Cards

Your Vision Realized

Smart cards have changed the way people live and work. As a passport to the digital world, smart cards secure identity for everyday living. For over fourteen years CardLogix has been at the forefront of smart card technology development and manufacturing, shaping the digital future with smart cards.

Mastering business opportunities requires vision. Developing a smart card system requires expertise. From SIM cards to stored value to complex secure identities, CardLogix meets the unique and varied needs of card systems worldwide. Utilizing a rich experience in operating systems, plastics, manufacturing, and integration, CardLogix responds to every customer's vision with a creative approach.

Our Vision

CardLogix' vision is to enhance our clients' ability to securely conduct business with their customers through our card technology—any time, any place. We accomplish this goal by providing the tools, information, and competitive products needed to help our customers complete their vision.

Concept and Design

From concept to finished design, we can support your vision with graphics help and award winning software development tools specific to each market opportunity. Each development environment lets you design, prototype, and configure your smart card application quickly. CardLogix middleware provides an easy to use, structured approach to system deployment. Our software, tools, and support reduce your time to market.

Operating Systems

CardLogix Card operating systems are tailored for diverse system architectures, security levels, and price points. Our wide variety of multifunctional high security OS's ensure an optimum choice for each application.

Manufacturing

From small runs to high-volume production, CardLogix manufacturing guarantees data security and measurable quality while meeting market demands for short cycle times. As an ISO 9001:2008 world-class manufacturer, CardLogix produces cards that exceed all industry standards for quality and workmanship.

100% functional testing is conducted on all cards, with complete traceability guaranteed from incoming material inspection through customer delivery. CardLogix employs a strict security management system that is maintained throughout all phases of manufacturing, ensuring complete protection of our customer's intellectual property.

Integration

CardLogix Smart Partners extend market expertise and skill sets even further with integration support. Our mission is to streamline your time-to-market with an emphasis on responsiveness and quality.

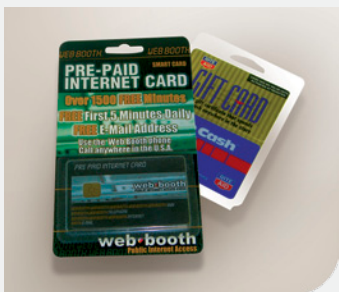

Partnership

Numerous applications are already available through our diverse set of partners worldwide. These range from healthcare systems to national ID programs. Call us with your needs and we will recommend a Smart Partner.

INNOVATIVE

Fulfillment

Our fulfillment services can help your program realize its full potential by providing supplementary collateral that supports each program's unique message. These services range from custom blister packing to personalized mailers for each product launch. Let CardLogix help you add impact to your program.

Since 1998, CardLogix has supplied millions of cards and software to thousands of secure applications. As a U.S. company we've helped our customers identify employees, log into networks, issue payments, and even vote—all with ever-higher standards for security, quality, trust, and value. We make it easy to try our products, develop with our software, and put your program into motion. CardLogix knows that a secure card is the cornerstone of a more secure system. Let us show you how to inform, empower, and protect with CardLogix smart cards and software.
