

## DSV2+<sup>Turbo</sup>® *Quick Reference Guide*

### **THE BATTERY:**

- The DSV2+<sup>Turbo</sup> products ship with the battery connected. To optimize performance and usage time it is recommended that you fully charge the battery before use. A fully charged standard battery usually lasts over 5 hours. Recharging takes about 3 hours when fully depleted.

### **CHARGING THE BATTERY:**

- To charge the battery plug in the AC power adapter. The **Power** button LED (located under the Function Keys) will turn “Red” indicating the battery is charging. When the LED turns off the unit is fully charged.

### **USING THE DSV2+<sup>Turbo</sup> AND ASSOCIATED DEMONSTRATION APPLICATION:**

- To turn the DSV2+<sup>Turbo</sup> on, press the **Power** button (located under the Function Keys) and hold down until one beep is heard. Release the button (two more beeps are heard).
- The unit takes approximately 30 seconds to boot as diagnostic testing is performed. The display will indicate that the system is booting.
- When the unit powers up, the Windows CE.NET desktop will appear on the display.
- Using the stylus, **double click** on **My Computer**.
- **Double click** on **Storage Card**.
- **Double click** on **DSVII**
- **Scroll down** to the bottom and locate the **SuperViewer** program. Double click **SuperViewer.exe**
- The demo application will start and display the message “**Waiting for Document**”.
- Insert a smart card, with contact side facing up, into the smart card slot on the right side of the unit or insert media to be scanned into the scanner opening. Use the same procedure with a contactless smart card, except hold the card next to the smart card reader. Please note that you will need to contact Datastrip sales at 800-548-2517 (610-594-6130 for international callers) or info@datastrip-inc.com to get demonstration smart cards.
