## **CARDLOGIX INTRODUCES THE CREDENTYSYS™ DUAL INTERFACE SMART CARD FAMILY FOR SECURE ID**

**Irvine, Ca. – September 6, 2006** – CardLogix, a leading provider of secure smart cards, announced today the *CREDENTYSYS™* smart card family for secure ID and access. The family consists of smart cards that meet the requirements of the U.S. Government Personal Identity Verification (PIV) program for securing identity, data and facilities.

The U.S. Department of Homeland Security has mandated that all Federal Agencies start issuing FIPS 201 approved PIV II cards by the fall of 2006. Governed by Presidential Directive (HSPD) 12, this program will verify the identity of every employee throughout all agencies and significantly improve data security as well. Employees will use the card for identification, as well as facility and data access. The cards are programmed with security levels appropriate to individual status and required access. Using advanced cryptography, the card authenticates and protects the cardholder's identity and privileges from unauthorized access and use.

*CREDENTYSYS* Card Family features include:

- A choice of two secure OS configurations, Multos and Java Card
- Dual interface technology- with two interfaces in the same card; *CREDENTYSYS* cards can either be inserted into a reader or passed by a contactless-type reader.
- Patented *Flexible Bump* interconnection technology. This manufacturing process innovatively extends the durability of the card's internal connections to the embedded antenna for longer life.
- *CREDENTYSYS* cards are hardened for security and enhanced for performance with advanced RISC processors with crypto-cores. They feature EAL 4 silicon with NSA Suite B-compliant encryption.

CardLogix has considerable experience supplying smart card platforms to governments worldwide, with applications in security, financial, transportation and healthcare. As an approved supplier to the U.S. government, CardLogix is listed under Cage Code 1KV39. The company is also certified to ISO9000-2001. The *CREDENTSYS* smart card is available now in sample quantities.

### **About CardLogix**

Founded in 1994, CardLogix is an ISO 9001/2000 Quality manufacturer of smart card technology platforms for the secure transaction of data and value. CardLogix smart card platforms empower applications such as Stored Value, Secure ID/Access and Loyalty throughout the world, making every transaction safer and easier. The company partners with reader suppliers, solution providers, and systems integrators to provide complete smart card systems.
