

CARDLOGIX, NEXPERTS, AND CHARISMATHICS TEAM UP AT MOBILE WORLD CONGRESS

Newest SIMs, Applications for Mobile Work and Play

Barcelona, February 16, 2009 – CardLogix, a U.S. manufacturer of SIMs and software for mobile telecom, is exhibiting at Booth 2.1A26 at the Mobile World Congress. Solutions partners Nexperits and Charismathics are in the booth, featuring demonstrations of leading NFC and PKI applications that work with CardLogix SIMs and enhance the convenience and security of work and play in the mobile environment.

CardLogix is featuring SIM cards with Delos™ and Java Card Operating Systems. Also featured are development tools for mobile applications, including Geode™ and Virtuosimo™.

Nexperits Near Field Communication (NFC) solution, Smart Poster, downloads coupons, tickets, and data directly from an NFC-tagged poster. Smart Poster simplifies and expands web access for an NFC-enabled mobile phone. Users simply touch the phone to the poster for access to a wide variety of private and public information and services. This interactive technology instantly engages users and creates unlimited marketing potential for mobile environments.

Charismathics iEnigma ©. provides an easy to use, flexible identity and security solution for mobile PDA cellphones, by leveraging the functionality of a smart card to store and transmit encrypted data. iEnigma makes it easy to integrate two-factor authentication into mobile communications, allowing users to utilize digital signatures to sign documents and protect their identity.

About Charismathics
