Troposphere<sup>®</sup> Identity Server (TIS) provides identity management and user provisioning in a single low-cost, cloud-based platform that works across a wide variety of systems. It is an ideal database system for transactional query-based applications that need standards-driven identity interfaces. TIS is designed to interface with credential encoding software platforms such as CardLogix' Card Encoding Engine<sup>®</sup> and other IAM programs such as Oracle Identity Manager, LDAP, Active Directory, and AFIS systems. It is also idblox<sup>™</sup> ready, so support for standardized credentials is a snap. When used in conjunction with other components, TIS enables an organization to define and automate the entire ID credential lifecycle process.

## Benefits

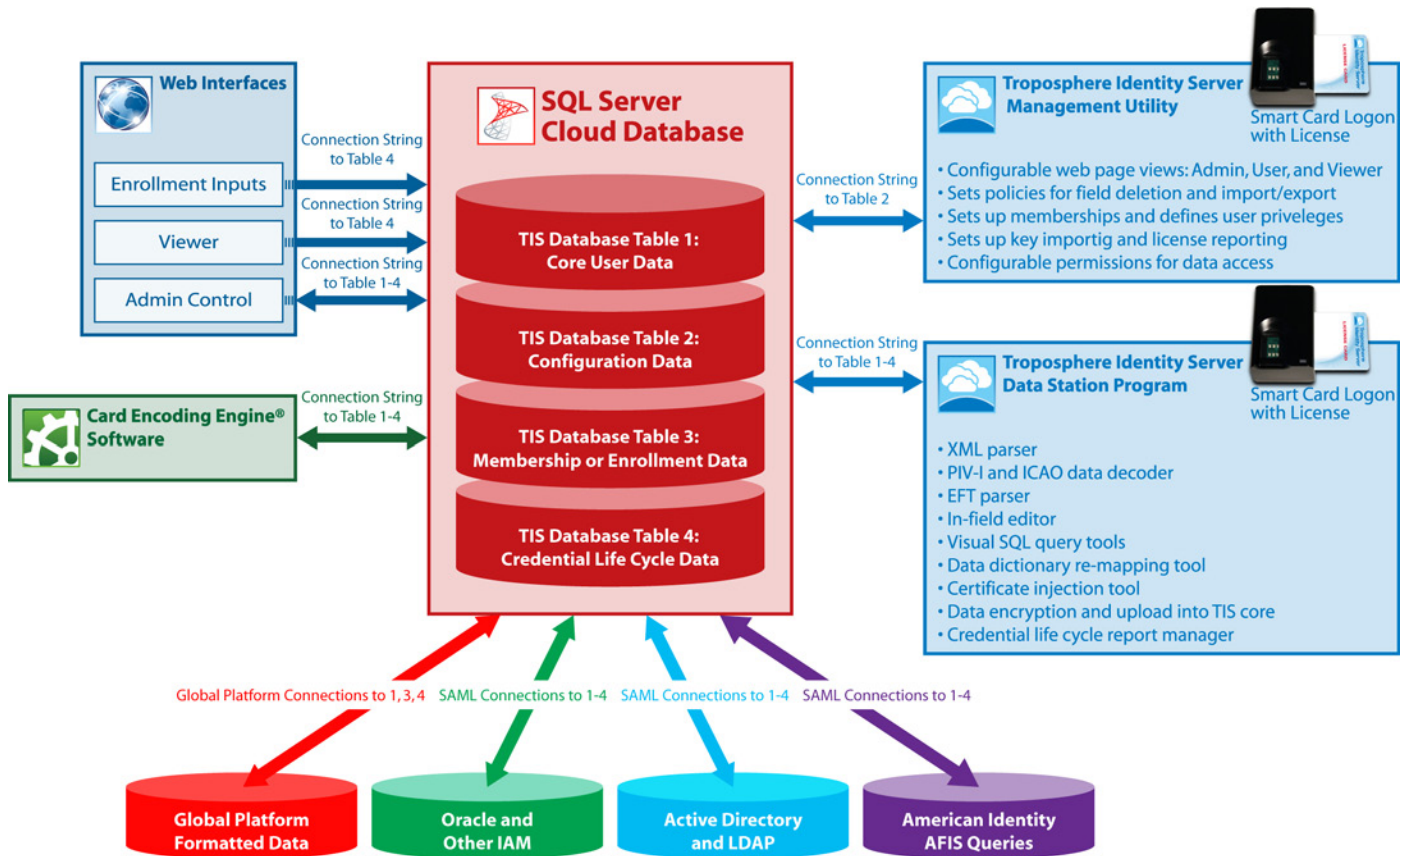

- Adaptability to various credential applications
- Pre-built logical data structures make configuration quick and simple
- High Security using built-in authentication
- Cost competitive
- 1 year of free upgrades
- 6 months of free maintenance
- AFIS ready
- idblox<sup>™</sup> compatible

## Features

- User-friendly Microsoft SQL interaction
- Can be hosted on shared or dedicated servers
- Works with COTS equipment for functionality and interoperability
- Data is encrypted at rest
- Optional smart card based log-on
- Flexible deployment architecture

# Troposphere<sup>®</sup> Identity Server

TIS provides a full-featured relational database that enables many different types of credentials. Some common types include:

- Enterprise Smart Badges
- Student IDs
- National IDs
- Player Tracking Cards
- Voter ID Cards
- Driver Licenses
- Driver Tachograph Cards
- Healthcare Staff IDs
- Insurance ID Cards
- Hospital Staff IDs
- Firearm / Concealed Weapon Control Cards
