

# **SCR243**

## **PCMCIA Contact Smart Card Reader**

### **Features**

- ISO 7816 smart card reader
- PCMCIA type II slot
- Easy-to-install / remove
- Ideal for travellers due to its robust design
- Open-end mouth for convenient smart card insertion & removal
- In field firmware updates
- Compliant with all major smart cards and relevant industry standards
- Customization options: Company logo OEM branding on the label

## **Typical Applications**

The SCR243 is ideal for the integration into notebooks, PDA's or PC bus systems with a standard PCMCIA Type II slot. It is suitable for a wide range of applications, e.g. home banking, network security, secure logon, email encryption, online gaming and shopping, as well as for online loyalty points redemption and other PC related applications.

Its robust metal-casing ensures highest durability in all conditions.

### The SCM Microsystems' Advantage

#### **Trusted Partner**

- ASIC (application specific IC) and smart card reader development experience since 1990
- · Innovative solutions more than 50 patents filed
- Reliable high-quality mass production capability more than 15 Mio. reader solutions deployed to date
- · Active role in standardization committees
- Complex project management expertise

   e.g. U.S. Department of Defense CAC program,
   electronic ID applications (ePassport, health card projects, national ID, driver licence)

#### Support

- · Global presence and support
- Product customization options
- Product branding
- Dedicated Research & Development and customer support team
- Strong global partnership network with leading suppliers along the value chain (smart card manufacturers, application providers, system integrators, device manufacturers)

## **Trusted Products**

- Broadest portfolio of security technology products for governments, corporations, financial institutions, small and medium-sized enterprises and individuals around the globe
- Secure smart chip reader design certified and compliant to EMV, Common Criteria, PC/SC, USB
- High-quality products designed to meet the various requirements in the data security area
- Flexible and future proof solutions SCM's SmartOS<sup>™</sup> firmware and its own ASIC technology allow in Field upgrades and secure your investment
