

10

Reasons to Choose Identiv's Smart Card Readers

1

TAA Compliance:

Identiv is a U.S. company based in California. All smart card readers are manufactured in TAA-compliant nations.

2

Global Verification:

Identiv supplies smart card reader solutions globally, including projects in Europe and Asia, and has served the DoD and U.S. federal government since the inception of HSPD-12.

3

Trusted for 25 Years:

Identiv is the trusted brand for smart card reader technology and the company's contactless expertise is considered the best in the industry.

4

Industry Standard:

Identiv's smart card readers adhere to international IT security industry standards, including ISO 7816, PC/SC, and USB CCID.

5

Largest Portfolio:

Identiv offers vast OEM capabilities and the largest form factor portfolio of modules and desktop smart card readers of any company in the space.

6

Dedicated Division:

Identiv's smart card reader division is a dedicated business unit, not an offshoot of another division.

7

Faster Throughput:

Identiv's smart card readers have faster throughput compared to competitive offerings — in some cases, 50% faster.

8

Customizable:

Identiv has expertise in custom board layout, antenna design and tuning, firmware development, and driver development. Identiv can customize readers with logos and different color plastics, cable lengths, and connectors.

9

Expert Engineers:

Dedicated engineers keep drivers and firmware consistently up-to-date and Identiv has IP around firmware and OS.

10

One-of-a-Kind:

Identiv is the only smart card reader manufacturer to work with OtterBox's ruggedized case systems.
